

VAN DIEST SUPPLY COMPANY

Serving Agriculture Since 1956

Van Diest Supply Co. 68th Anniversary

It does not seem possible, but we are now in our 68th year in business. Mary and I extend our heartfelt thanks to every TEAM MEMBER, CUSTOMER and SUPPLIER for helping us reach this milestone at Van Diest Supply Company.

Let us take a look at the past:

During the past 68 years we have grown from one person to over 600 Team Members.

We have never had a lay off or a strike in 68 years. Van Diest Supply Company has always been a dependable work place.

Van Diest Supply Company is a modern progressive company and our Team Members have good facilities and good equipment to work with. We have an excellent Team of people. Our TEAM MEMBERS, CUSTOMERS and SUPPLIERS have made our success possible.

We have grown from one location marketing in and around Webster City to 27 locations marketing in 18 states and manufacturing chemicals that are sold around the world. We are proud to be a 3 generation family owned American company.

Van Diest Supply Company is committed to the Crop Protection Industry. We have 20 Distribution Centers located across the Midwest to serve our customers needs. We appreciate the business they have honored us with and the confidence they have placed in us. This past year we have added additional warehouse space in Wayne, NE, Mapleton, ND, 110,000 square feet of warehouse space in Webster City, Iowa and began construction of a new 40,000 square foot warehouse space in Pierre, SD to better serve our customers.

Our sincere THANKS to each and every TEAM MEMBER, CUSTOMER and SUPPLIER for making the success of Van Diest Supply Company possible. We will continue to work for mutual success. We are here to help you succeed and we do appreciate having you as a member of our Team.

Thanks again,

A handwritten signature in black ink that reads "Bob & Mary". The signature is written in a cursive, slightly slanted style.

History of Van Diest Supply Company

Bob Van Diest started Van Diest Supply Company in the fall of 1956. The business started out as a sideline to his grain and livestock farming operation.

During the first several years of operation, Bob sold agricultural fertilizer to his own farm and to friends and neighbors. Bob saved money on his own fertilizer needs and provided his friends and neighbors a savings on their fertilizer. Sales during the fall of 1956 were \$1,916 and profits were \$32. During the first full year of business in 1957, sales were almost \$10,000 and profits were \$386. In 1959, Van Diest Supply Company began to diversify by expanding its sales to include 2,4-D.

Bob was married in 1959, and his wife, Mary, became active in the business and was a big help with accounting. The business was operated from a small office in the Van Diest home, and business was often times transacted over coffee around the kitchen table. When Bob was in the field farming, Mary would answer the phone, take orders and wait on customers. She has been active in the Accounting Department ever since and continues to be a tremendous asset to Van Diest Supply Company.

VAN DIEST SUPPLY COMPANY IN 1956

The office was 5' x 10' in the house, just to the right of the door

The warehouse was in the corn crib alley

In 1966 Van Diest Supply Company built a new building 50' x 96' that contained both a small office and warehouse space for chemicals. Van Diest Supply Company's first full-time employee was hired in 1967 and the business was incorporated in 1968 with net assets of \$60,000. Van Diest Supply Company continues to be a family-held corporation with all the stock held by Bob, Mary and their four children. The company operates today under the same basic principles held at the time the company was founded in 1956.

VAN DIEST SUPPLY COMPANY TODAY

Van Diest Supply Company Main Office

History of Van Diest Supply Company

Van Diest Supply Company now employs over 600 Team Members, has 54 buildings on approximately 270 acres at Webster City, Iowa and Nineteen outlying distribution centers located across the Midwest.

WEBSTER CITY, IOWA FACILITIES

Van Diest Supply Company is committed to agriculture. Van Diest Supply Company is unique in the wide array of services offered to the agricultural industry:

Product Development

Process Development

Formulation

Warehouse Storage

Liquid Bulk Storage

Distribution

At Van Diest Supply Company PEOPLE MAKE THE DIFFERENCE. We believe people deal with people who have a sincere interest in their business and a desire to help them. We strive for long- lasting partnership relationships with our Customers, our Suppliers and our Team Members.

Three Generations

“Three generations strong with Bob, John, and Jake Van Diest all active in the family business.”

Facilities...Equipment...Commitment

Chemical Distribution

Van Diest Supply Company is a full-service distributor for all of the major agricultural chemical companies. These crop protection products are warehoused at Webster City, Iowa and our nineteen outlying distribution centers then sold and delivered to approximately 6,000 customers throughout an eighteen-state area located in the heart of the Midwest Cornbelt.

Van Diest Supply Company marketing people are located throughout the Midwest. They generate sales and supply technical support to our customers. The products are delivered to dealers from Webster City, Iowa and from our nineteen outlying distribution centers by company-employed drivers in company-owned trucks.

Delivery Capacity

We have a company-owned delivery fleet of 85 semi tractors, 55 straight trucks and 144 pickups. We have 82 van trailers for packaged goods and 34 bulk transports. Van Diest Supply Company can deliver nearly 5 million pounds of product per day with our own delivery fleet.

Distribution Centers

Our 20 locations are fully staffed year-round to serve our customers.

Cornbelt® Products... Quality Formulations

CORNBELT®

Family of Quality Products

A product cannot carry the Cornbelt® label unless that product is as good as or better than competitive products in the market today. This is the way we do business. This is our promise to our customers.

“The Right Choice”

Formulation Capabilities

Van Diest Supply Company's formulation facilities utilize the latest state-of-the-art technology for production of all of the major forms of herbicides: amination, spray dried, emulsifiable concentrates, suspension concentrates, suspo-emulsions, pan granulated water dispersible granules and extruded water dispersible granules. Our facilities are used to formulate products sold under Van Diest Supply Company's own Cornbelt® label as well as formulating products for all of the major national and international chemical companies. We produce products that are shipped around the world.

Our technology is some of the best in the industry, but the heart of our formulation organization is our dedicated Team Members. Our Formulation Management Staff has over 700 years of combined experience formulating products used throughout the world.

Solid Batching Stations

Drum Heating Capabilities

Products are packaged in a wide variety of containers to fit market needs

Robotic Palletizing and Labeling

Formulation Capabilities

MICRO- ENCAPSULATION

Our 3 state-of-the-art Micro-Encapsulation facilities are used to formulate delayed release herbicides to enhance weed control and minimize herbicide loss.

SUSPO-EMULSIONS

Van Diest Supply Company leads the industry in Suspo-Emulsion formulation technology. Suspo-Emulsions combine technical products that are normally incompatible by dissolving or suspending one technical in an oil phase and a second technical in a water phase and then combining the two for ease of application.

SUSPENSION CONCENTRATES

Van Diest Supply Company has 4 Suspension Concentrate facilities utilizing our own micro-homogenizing process to produce the highest quality liquid flowable herbicides in the marketplace.

EMULSIFIABLE CONCENTRATES

Van Diest Supply Company has 3 Emulsifiable Concentrate (EC) facilities. These products are formulated to quickly emulsify in water and maintain their emulsions for optimum weed control.

AMINATION

Van Diest Supply Company has an amination facility, containing process equipment, that allows us to perform reactions of this type. Multiple reactors, tons of cooling capacity, air scrubbers, and recycled effluent means large scale production capacity that is also environmentally friendly.

SPRAY DRYING

The latest addition to our formulation capabilities is spray drying. Manufactured by SPX-Anhydro, our spray dryer is 12' in diameter and stands approximately 40' tall. With rotary wheel atomization and stainless- steel construction, it can produce spray dried powders at a rate of approximately 1,000 pounds per hour, depending on the formulation. Adjacent to the spray dryer is a suspension concentrate facility utilizing a micro-homogenization process that can be used with the spray dryer or as a stand-alone unit.

WATER DISPERSIBLE GRANULES

Van Diest Supply Company formulates Water Dispersible Granule herbicides utilizing 4 different technologies. We have 6 plants utilizing Radial Extrusion, 3 plants utilizing Basket Extrusion, 1 using Twin Dome and 1 plant utilizing Pan Granulation. All plants are protected with sprinkler equipped warehouses and explosion suppression systems in process areas.

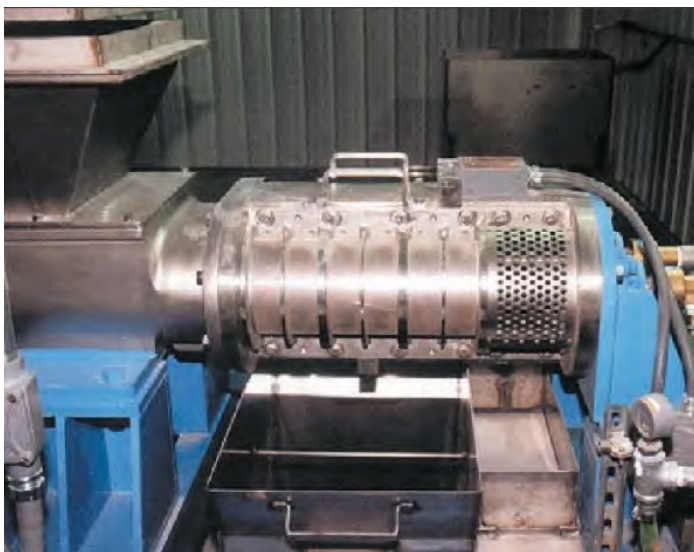

PACKAGING

Van Diest Supply Company packages herbicides in a wide variety of package sizes and case configurations. Liquids are packaged in containers as small as 1 liter and as large as 300 gallons. Dry herbicides are packaged in containers as small as 11 grams and as large as 1,000 pounds. Our packaging flexibility allows us to package products in a wide variety of package sizes.

HIGH SPEED PACKAGING

Our primary packaging line is an industry leader capable of packaging rates up to fifty 2.5 gallon bottles per minute. It features automated bottle de-palletizing, printing, labeling, 18 fill heads and robotic case erection, case packing, palletizing and wrapping. Bottle sizes on this line range from 1 gallon to 10 liters.

Formulation Capabilities

Radial Extruder

Basket Extruder

Bottle Depalletizer

Stainless Steel Ribbon Blenders

Automated High Speed Packaging

Automated High Speed Capping

Formulation Capabilities

Baghouses feature cartridge filtration, explosion suppression, and clean-in-place design

Stainless steel batching station for both bulk bags and drums

Stainless Steel Air Classified Mill

We utilize vibrating fluid bed dryers to ensure correct moisture levels in finished product

Rotary Sifter

Cartridge filter baghouse with metered air flow to optimize efficiency

Stainless Steel loss-in-weight product delivery system feeding our granulation equipment

We feature basket granulation, radial extrusion, and pan granulation

Formulation Capabilites

Automatic Case Erector

Stainless steel augers promote years of corrosion-free operation

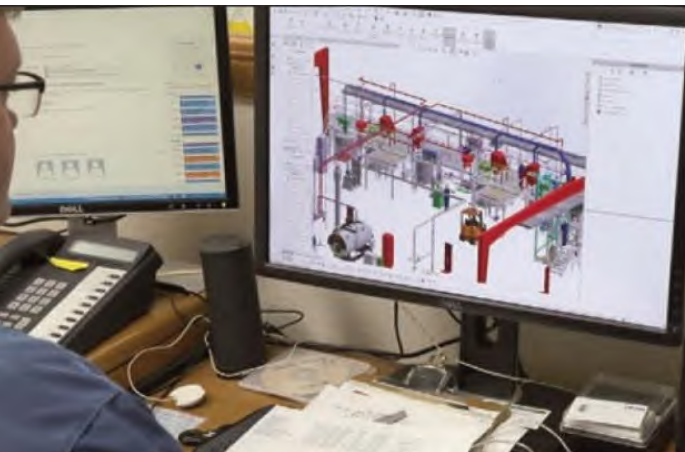

Basket Extruder

Process reactors with bulk bag unloaders

Facility Design Capabilities

We bring projects from concept to completion in a fast, efficient manner. Our in-house design capabilities allow us to work with customers to determine their manufacturing needs then develop a scope of work and bill of materials very quickly for review, procurement, project initiation, and often completed in 12 months or less!

Solidworks Design

Custom Manufacturing Solutions

Commitment to Safety and the Environment

Van Diest Supply Company's safety and environmental policy states, "Van Diest Supply Company will not formulate, apply, store, sell, transport or dispose of a product unless we can do so in a manner safe to our employees, our customers and the environment." Bob Van Diest has often stated, "If we can't do it right, we won't do it at all." Van Diest Supply Company employs full time Environmental and Health and Safety Directors to lead our EHS programs. The Safety Director and employee Safety Committees provide direction and training to our Team Members in our comprehensive safety program. Van Diest Supply Company utilizes a variety of safety programs for continuous safety improvement to provide a safe working environment for our Team Members.

Jim Piaszynski
Director of Environmental Compliance

Kris Rossmiller
Director of Environmental Compliance

Dr. Jim Kumm
Director of Health & Safety

Quality Department

Van Diest Supply Company is committed to quality in everything we do. Our quality product states, "Van Diest Supply Company is committed to providing products and services that consistently meet or exceed the expectations of our customers." This has been the driving force in our commitment to excellence and continued improvement.

Van Diest Supply Company received certification in the industry standard for quality management, ISO 9001, in 1992. We remain one of only a handful of manufacturers in the State of Iowa with this certification.

Grant Sleeten
Director of Quality Management

Triple Quad LC/MS Analysis

Van Diest Supply Company's formulation, product development and bulk terminal operations are backed by an experienced staff of trained chemists and technicians and state-of-the-art equipment in our quality control laboratories. Our analytical capabilities include GC, HPLC and LC Mass Spectrometer.

Bulk Terminal Facilities

Josh Lacey
Bulk Terminal Manager

With over 20,000,000 gallons of capacity, Van Diest Supply Company, operates one of the largest herbicide terminals in the region. Our terminal allows strategic use of formulation facilities to anticipate the peak in-season needs. Van Diest Supply Company's bulk herbicide terminal stores liquid bulk herbicides in a safe and environmentally sound manner. Nearly all of our tanks operate with stainless steel pumps and pipe and all of them are located inside heated buildings. Over 8,000 linear feet of track provides capacity for over 60 rail cars. Fall protection systems and fire monitors at the rail allow us to load or unload rail tankers safely, quickly, and efficiently.

Tank trailers are loaded and unloaded in modern, environmentally sound load out facilities. 108 tanker trucks can be loading or unloading under roof in loading bays.

Van Diest Supply Company Public Warehouse

With 272,500 sq. ft. of available space, our new warehouse provides an exceptional opportunity for customers to simplify their supply chain by avoiding the unnecessary extra shipment of material to more distant public warehouses. Raw materials and inputs can ship to Van Diest Supply Company ANYTIME before a production campaign and, when needed, Van Diest Supply Company will provide the shipping from Warehouse to Manufacturing, saving our customers time and money on each shipment.

James Hedeem
Formulation Inventory
Manager

Kory Moothart
Public Warehouse
Manager

Bulk Tanker Wash Facilities

Van Diest Supply Company has a state-of-the-art Bulk Tanker Wash Facility for cleaning and decontaminating tankers between different herbicides. Our Bulk Tanker Wash Facility allows our customers maximum flexibility with their tanker fleets during the busy season when hauling large volumes of products from our Bulk Terminal Facilities. All wastewater generated is treated in an environmentally safe manner.
